

ATV Mounting

MOUNTING BRACKET WITH HAND-CRANKED LIFT

- **32" of Height Adjustment**
- **Your Choice:
Sturdy Hand-Cranked Lift or
Convenient Electric Lift**
- **Easily Mounts With Four Bolts**
- **Fits Most 4-Wheel ATV's With
Front or Rear Rack**
- **Mounts On Horizontal or Vertical
Surface**
- **To Be Used With Speidel Appli-
cators Size 6'9" , 8' , 9'6" , 10'6" or
2-6'9" (for 13'6")**

For best results, weeds should be actively growing. Type of weeds, weed maturity, growing conditions, and amount of wiping surface wetness affects mixing rate.

Speidel Wicks

SPEIDEL WICK MOUNTED ON A TRACTOR

The **SPEIDEL WEED WIPER** is a wiping type herbicide applicator for economically controlling weeds growing above any crop with a non-selective herbicide. Design has been kept very simple with no tanks, pumps, or ropes. The **SPEIDEL WEED WIPER** consists of a perforated plastic pipe reservoir covered tightly with two layers of a selected absorbent canvas wiping surface & a rate of flow control valve. Solution is gravity fed through the holes to soak the entire wiping surface. Flow can be adjusted for thicker or thinner weed densities, faster or slower travel speed, or shut off completely when stopped by regulating the amount of air that can enter the pipe.

With greater wiping surface, short wicking distance, and adjustable flow rate, the **SPEIDEL WEED WIPER** will provide better weed coverage with a weaker solution in a single pass without dripping, thus saving time, chemical cost, and crop damage.

Advantages of the SPEIDEL WEED WIPER

- Valve controlled rate of herbicide flow from zero to very fast.
 - No drying out in thick weeds
 - Won't drip when not using
 - Fast reaction time.
- Uses less chemical
- Easy cleanup with water
- Lightweight, simple design
